

SUMMER 2012

Wisconsin Avenue - *temporary exit*

As part of the Zoo Interchange project, the Wisconsin Department of Transportation (WisDOT) will construct a temporary exit at Wisconsin Avenue from northbound US 45.

The new exit will help alleviate congestion during reconstruction of WIS 100 (2013) and Watertown Plank Road (2014) and will allow for reliable access to the Regional Medical Center, Wauwatosa and Milwaukee.

CONSTRUCTION

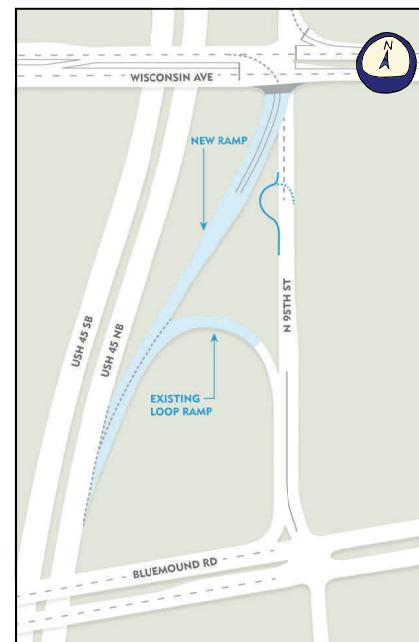

In late summer 2012, construction of the temporary exit at Wisconsin Avenue will begin. The new exit will be under construction through November 2012. The current Bluemound Road exit will remain open during all but two weeks of the construction project and will remain open for significant Milwaukee County Zoo events.

To accommodate the new temporary exit to Wisconsin Avenue, WisDOT will construct a temporary cul-de-sac on 95th Street at Wisconsin Avenue. 97th Street will remain open as a connection between Wisconsin Avenue and Bluemound Road. A traffic signal will be installed at 97th Street and Bluemound Road to accommodate the new traffic pattern.

Later in the Zoo Interchange project, 95th Street will be reconnected to Wisconsin Avenue, the temporary exit will be removed, and a new interchange will be built at Bluemound Road.

DESIGN

The existing northbound off-ramp at Bluemound Road is a loop ramp which exits onto Bluemound Road. The new temporary exit will provide an additional exit adjacent to the loop which will extend to Wisconsin Avenue.
